

DiLumen[®] EZ Glide

Endoluminal Interventional Platform (EIP)
with hydrophilic EZ Glide coating.

Introducing DiLumen's newest innovation: EZ Glide

EZ Glide is a proprietary hydrophilic coating applied to DiLumen's inner sheath. Activated by simply water or saline, EZ Glide reduces the need for lubricants. The result is an easier, faster and cleaner preparation, with a very significant improvement in endoscopic stability, visibility, and control.

Colonoscopies

About the DiLumen Platform

DiLumen EZ Glide provides decisive advantages to GI professionals who perform endoluminal procedures.

- **Improved endoscopic performance:** stabilizes the endoscope tip and the nearby anatomy.
- **Gentle anatomic control:** safely straightens and penetrates tortuous anatomy for faster access and improved control.
- **Cleaner preparation and improved visibility:** reduces the need for gel or oil during preparation and improves intraoperative visibility.
- **Conduit:** enables safe and repeated access, and efficient exchange of tools and tissue removal.

Selected Testimonials

Dr. Michel Kahaleh – Robert Wood Johnson Medical Center, New Brunswick, NJ

"Before I saved two hours' time with EZ Glide as compared to a similar procedure performed two weeks prior, without DiLumen."

Dr. Stuart Gordon – Dartmouth-Hitchcock Medical Center, Lebanon, NH

"We couldn't have removed these four cecal polyps without the new DiLumen EZ Glide."
